Professional Summary

Technical Product Manager with 3+ years of experience spanning product management, solution design, customer engagement, data analysis and technology delivery, including experience at Huawei Technologies and current fintech product work at QOSPAY. Experienced in translating business needs into technical requirements, coordinating with engineering teams, supporting API integrations and product testing, and taking products toward pilot and market readiness. Current product exposure includes transaction and fraud monitoring, PEP/sanctions screening, AI-powered identity verification and compliance solutions. MSc in Computer Science with a strong technical foundation across AI/ML, software development, cloud and data.

Core Product Competencies

Product Strategy & Lifecycle Management • Product Discovery & Requirements • Roadmaps & Prioritization • Cross-functional Engineering Collaboration • API & Integration Planning • Product Testing & Validation • Pilot / Launch Readiness • Stakeholder & C-level Management • Market & Competitor Research • Risk / RAID Management • Fintech Compliance & Fraud Products • AI / Identity Verification • Data Analysis & Product Insights • Solution Architecture • Agile Collaboration • Technical Documentation.

Professional Experience

Aug 2026 – Present *QOSPAY - QOS Integrated Center, Lagos State.*

Product Manager / Technical Product & Solution Architecture

- Drive product activities across transaction monitoring, fraud monitoring, PEP/sanctions screening and AI-powered identity verification solutions for fintechs and financial institutions.
- Translate business, compliance and customer needs into product requirements, workflows, technical specifications and API/integration requirements for engineering teams.
- Coordinate functional and technical testing across fraud, transaction monitoring and sanctions/PEP capabilities; track defects, scenarios, dependencies and readiness for pilot integrations.
- Support product lifecycle activities including documentation, risk analysis, prioritization, validation, pilot readiness and go-to-market planning.
- Research and evaluate identity-verification approaches through proof-of-concept testing, including liveness detection, face matching and OCR-related workflows, to inform product design decisions.
- Conduct market and regulatory research to support product positioning and planned expansion across African financial markets.

Dec 2022 – Feb 2026 *Huawei Technologies, Lagos State.*

Product Manager / Solution Architect / Data Analyst

- Partnered with C-level stakeholders, sales teams and technical teams to identify customer pain points, analyze network and market data, and align technology solutions with business objectives.
- Supported product and solution lifecycle activities from customer discovery and requirements gathering through solution design, demonstrations, trials and deployment planning.
- Led executive-level solution demonstrations and technical engagements for major telecom operators including MTN, Airtel and Glo.
- Designed migration approaches from existing telecommunications infrastructure to next-generation Huawei solutions and coordinated technical inputs across stakeholders.
- Conducted market trend surveys and data analysis to generate insights for product positioning, customer strategy and commercial opportunities.
- Delivered technical workshops to 100+ engineers and enterprise customers and acted as a bridge between business decision-makers and engineering teams.

May 2017 - Aug 2017 *(NNPC) Nigerian National Petroleum Corporation, Kaduna*

IT Personnel

- Supported network, system and data availability and assisted with troubleshooting across organizational IT systems.
- Supported junior team members with network security and troubleshooting procedures and assisted with LAN infrastructure expansion.

Projects

- **AI-Powered Identity Verification / Liveness PoCs:** Evaluated open-source approaches for active and passive liveness, face matching and identity-verification workflows to support QOSPAY product research and technical decision-making.
- **Chatbot-Based E-commerce Recommendation System:** Designed a multilingual AI recommendation solution combining a chatbot interface with machine-learning recommendation techniques as an MSc thesis project.
- **Cloud Infrastructure & Architecture Labs:** Designed Azure virtual networks, subnets, VMs, security groups and container deployments; completed AWS cloud foundations labs covering EC2, S3, VPC, RDS and monitoring concepts.

Technical & Product Tools

- **Product / Delivery:** Jira, Trello, requirements documentation, product testing, API/integration planning, RAID/risk tracking, market research, lifecycle and pilot-readiness coordination
- **Software / Data:** Python, JavaScript, TypeScript, React, Next.js, Node.js, Express.js, PostgreSQL, SQL, REST APIs, Pandas, NumPy, Scikit-learn
- **Cloud / Engineering:** Azure, AWS, Docker, Linux, Git, GitHub, Postman, VS Code

Certifications

Microsoft Azure AI Fundamentals (2024) • Oracle Database SQL Certified Expert • Meta Front-End Development (2026) • Meta Programming with JavaScript (2026) • Meta Advanced React (2026) • RPA Developer Advanced

Education

2022 *Covenant University, Ogun State*
Master of Science (MSc): Computer Science (Distinction)

2018 *Babcock University, Ogun State*
Bachelor of Science (BSc): Computer Science (Second Class Upper Division)

Research Publications

- 5 academic publications, including: Comparative Review of Vulnerability Analysis Tools (IEEE, 2024); Hybrid Machine Learning for Network Intrusion Detection (IEEE, 2023); AI Research in Nigeria: Topic Modelling (IJAI, 2023). Additional publications available on request.
