Professional Summary

Full Stack Developer with an MSc in Computer Science and hands-on experience developing fintech, AI-powered, and web applications. Skilled in React, Next.js, Node.js, Express.js, Python, FastAPI, PostgreSQL, SQL, and REST APIs, with additional experience in cloud infrastructure and AI/ML. Currently contributing to fintech software and identity-verification solutions while combining software engineering, technical product management, and solution architecture experience.

Technical Skills

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
- **Frontend:** React, Next.js, Bootstrap, Responsive Web Development
- **Backend & APIs:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** PostgreSQL, SQL
- **AI/ML & Computer Vision:** TensorFlow, Scikit-learn, DeepFace, MediaPipe, Pandas, NumPy
- **Cloud & DevOps:** Azure, AWS, Docker, Linux, Bash, Virtual Networks, VMs, Containers
- **Development Tools:** Git, GitHub, Postman, VS Code, Chrome DevTools
- **Product & Collaboration:** Jira, Trello, API Integration, Technical Documentation, Product Testing

Professional Experience

Aug 2026 – Present *QOS Integrated Center (QOSPAY), Lagos State.*

Software Engineer / Technical Product Manager

- Developing fintech applications for identity verification, fraud and transaction monitoring, and regulatory compliance, combining software engineering with technical product management.
- Building and testing Python-based AI identity solutions involving facial recognition, active/passive liveness detection, OCR, anti-spoofing, and selfie-to-ID face matching.
- Developing and evaluating backend services and proof-of-concept applications using Python, FastAPI, REST APIs, computer vision, and machine learning technologies.
- Collaborating with engineering teams on API integration, debugging, system testing, technical documentation, and pilot deployment of fintech solutions.
- Translating business requirements into technical specifications, application workflows, API requirements, and acceptance criteria, while supporting products from prototyping through testing and validation.

Dec 2022 – Feb 2026 *Huawei Technologies, Lagos State.*

Solution Architect / Data Analyst / Product Manager

- Partnered with C-level stakeholders and technical teams to gather requirements, analyze customer and network data, and translate business challenges into technology solutions.
- Designed solution architectures and migration approaches, supporting technical demonstrations, product trials, and deployments for major telecom operators including MTN, Airtel, and Glo.
- Conducted market and data analysis to generate insights supporting product strategy, customer requirements, and technology adoption.
- Delivered technical workshops to 100+ engineers and enterprise customers while acting as a bridge between business stakeholders, sales teams, and engineering teams.

May 2017 - Aug 2017 *(NNPC) Nigerian National Petroleum Corporation, Kaduna*

IT Personnel

- Ensured network, system, and data availability, maintaining and troubleshooting computer systems across the organization.
- Trained junior IT team members on network security and troubleshooting protocols, and assisted in the physical infrastructure expansion by connecting LAN cables to new offices.

Projects

Chatbot-Based E-commerce Recommendation System (Thesis Project) [GitHub](#)

- Designed and developed an intelligent recommendation system with a chatbot interface using Python.
- Applied machine learning techniques to generate personalized recommendations based on user behaviour and input.

- Integrated conversational interaction with recommendation logic to improve the user experience.

React E-commerce App [Live GitHub](#)

- A fully functional ecommerce web application built with React.
- Features include a shopping cart with quantity management, user authentication (login/signup), and persistent data storage using localStorage.

Real-Time Weather Application (React + API) [Live GitHub](#)

- Built a dynamic weather application using React and integrated a third-party API for real-time data.
- Implemented asynchronous data fetching with fetch and async/await.
- Designed a responsive user interface with conditional rendering for loading and error states.

Task Management Application (React) [Live GitHub](#)

- Developed a task management application using React with dynamic state management.
- Implemented features for adding, deleting, and updating tasks with persistent storage.
- Utilized React hooks (useState) to manage application state efficiently.

Cloud Infrastructure & Architecture Projects

Azure Cloud Infrastructure & Deployment

- Designed VNet/subnet architectures, provisioned Azure VMs, configured NSGs, and deployed containerized applications using Azure Container Instances.
- Worked with Azure resource groups, storage, monitoring, Linux administration, networking, and infrastructure security concepts.

AWS Cloud Foundations

- Built hands-on cloud environments using EC2, S3, VPCs, subnets, security groups, Internet Gateways, RDS, CloudWatch, and load-balancing concepts.

Certifications

- Microsoft Azure AI Fundamentals (2024)
- Meta Front-End Development (2026)
- Meta Programming with JavaScript (2026)
- Meta Advanced React (2026)
- Oracle Database SQL Certified Expert
- RPA Developer Advance

Education

2022 *Covenant University, Ogun State*
Master of Science (MSc): Computer Science (Distinction)

2018 *Babcock University, Ogun State*
Bachelor of Science (BSc): Computer Science (Second Class Upper Division)

Research Publications

- Comparative Review of Vulnerability Analysis Tools (IEEE, 2024)
- Hybrid Machine Learning for Network Intrusion Detection (IEEE, 2023)
- AI Research in Nigeria: Topic Modelling (IJAI, 2023) + 2 additional publications available on request
